

VIDEO TRACKER

ROBUST, HANDS-FREE TRACKING OF SCENE AND DESIGNATED OBJECTS. GEOPOINT, SCENE LOCK, AND INITIATED OBJECT TRACKING FOR A VARIETY OF APPLICATIONS.

- ▶ EFFORTLESS TRACKING OF MOVING AND STATIC OBJECTS
- ▶ LOCK SCENE FOR STABLE VIEWING
- ▶ BEHIND-THE-SCENES INTELLIGENCE TO HELP YOU GET A GOOD TRACK

FEATURES AND BENEFITS

- **Scene and Object Tracking:** Keeps entire scene in the frame using scene translation telemetry.
- **Vehicle and Stationary Modes:** Designated tracks on moving or static objects.
- **No Registration Mode:** Allows for object tracking when there are no background features.
- **Operational and setting flexibility** for improved tracker performance.
- **Acquisition Assist:** Automatically searches the area around an initial track location to find the optimal track box size and position.
- **Intelligent Assist:** Automatically reinitializes when changes in the target appearance are detected.
- **Multiple Target Tracking:** Track multiple objects in a frame and follow one at a time. Easily move from object to object.
- **Plug and play functionality**

VIDEO FORMAT: 3G HD/SDI
